

The Bavarian Formula- Converting Foreign Grades

The so called "modified Bavarian formula" provides aid in converting grades!

$$x = 1 + 3 \frac{N_{\max} - N_d}{N_{\max} - N_{\min}}$$

x = calculated Grade

N_{max} = best possible grade in the foreign grading system

N_{min} = minimum required grade for a "pass"

N_d = Grade accomplished

Example:	
N _{max} :	6
N _{min} :	4
N _d :	5,32
Result:	
x:	2,02
